

Earthquake Magnitude vs. Space Weather Variables

Zane van Campfort and Roman Avery

07/12/21

Variables used:

- R - Sunspot Number
- ap - Geomagnetic Activity Index
- f10.7 - Measure of 10.7cm radiation emitted from Sun
- AE - Auroral Geomagnetic Activity Index
- AU - Upper boundary of recorded geomagnetic activity
- PCN - Polar Geomagnetic Activity Index
- Proton flux (energy >2MeV)
- Proton flux (energy >10MeV)
- Proton flux (energy >30MeV)
